

## Deckel · Lids

Wir unterscheiden im Wesentlichen drei Arten von Deckeln aus Polypropylen (PP). Den Jordan „Stern“-Deckel, den Drehdeckel und den Klappdeckel.

Die Öffnungen sind zum einen als Streuöffnung (kleine Löcher), zum anderen als Schüttöffnung (große Öffnung) ausgelegt.

We basically have three types of polypropylene (PP) lid. The Jordan “star lid”, the screw-on lid and the lift-up lid.

There are sprinkle apertures (small holes) and pour apertures (large hole).

„Stern“-Deckel · “Star lid”

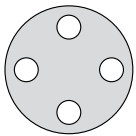

Drehdeckel · Screw-on lid

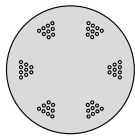

Klappdeckel · Lift-up lid

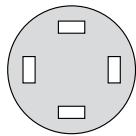

Öffnungsvarianten „Stern“-Deckel · “Star lid” hole configurations
